Request for Cooperation in the Keio Household Panel Survey - Children Survey

Thank you for your cooperation in our survey.

Through this survey, we intend to collect information regarding your present circumstances and changes in life, employment, and home economics, and elucidate the changes and other important factors of your lives in order to make proposals for future living through presentations at academic conferences.

At Keio University, we are planning to conduct the “Keio Household Panel Survey - Children Survey” for the respondents of this survey and the children of the respondents who are currently attending elementary or junior high school. The “Keio Household Panel Survey - Children Survey” will be related to this survey.

The purpose of this survey is to elucidate the relationship between social movement and child rearing comprehensively by asking questions regarding the child-rearing situation at home and children’s learning.

Questionnaire for respondents: With regard to child rearing (four pages per child, will take approximately five minutes to complete)

Questionnaire for children: Questions regarding learning and problems in mathematics, Japanese, and reasoning on the basis of the children’s grades (will take approximately 20-30 minutes to complete)

- * As we administer the survey, we keep personal information confidential. Survey sheets answered by children are collected after they have been sealed. Personal information is dealt with only by the survey firm so that the researchers who analyze the answers cannot identify individuals.
- * For those interested in the results of the children’s test, we are planning to make the test results accessible on the Internet. (This would be possible using a dedicated password.)
- * All respondents of the survey will receive remuneration (equivalent to book cards worth 500 yen). All children who cooperate in the survey will receive a special clear folder with the Keio logo.

Surveys targeting children are widely conducted in Europe and the United States, and the results are helpful for improving school education and child welfare. In Japan, the social situation surrounding children is drastically changing, as is evident from the establishment of “child allowance,” and studies related to child rearing and children’s learning are becoming increasingly important. Although this survey is a voluntary one, we greatly appreciate your cooperation and that you understand the purpose of the survey. (If you express the willingness to cooperate, we will send you a survey form.)

Are you willing to cooperate in the Keio Household Panel Survey - Children Survey?
